READING TEXT

Artificial intelligence already influences everyday decisions. Streaming services recommend films, navigation apps predict traffic and translation tools suggest sentences. These systems can save time, but they learn from large amounts of data and may repeat errors or unfair patterns. Users therefore need more than technical skill: they must check results, protect private information and decide when human judgement is necessary.

VOCABULARY STRATEGY

Do not translate every word. First read for the main idea. Then use the sentence around an unknown word to guess its meaning.
